⇒ <https://www.topoyna.com/>

Dijinar

(March 03, 2023 - August 26, 2023)

Frontend Developer

- I used php and codeinteger.
- I made many websites including Aksu-vital's website (aksuvital.com - avicenna.com.tr - naturalhekimce.com.tr - eznevita.com.tr - softem.com.tr - shiffahome.com.tr).
- I provided Google SEO service to topoyna.com
- I made the website of the BiKutla Project.
- Pure html css was used without using a library other than swiper.js.

⇒ <https://www.linkedin.com/company/dijinarajans/mycompany/>

EDUCATION

Sakarya Uygulamalı Bilimler Üniversitesi

(September 24, 2018 - September 16, 2022)

Licence, Civil Engineer

⇒ <https://www.subu.edu.tr/tr>

PROJECTS

Rick And Morty Wiki

Frontend

- I used <https://rickandmortyapi.com/> api
- I made it as a React project and it has api listing, filtering and search bar.
- I used Bootstrap and at the same time I used reactRouter as npm library in the project.

⇒ <https://rick-and-mort-site.vercel.app/>

Booking Clone

Frontend

- The frontend of the booking clone connected to the backend I made using React.
- Backend is connected to the server and Register / Login processes are actively running.
- There are options such as actively adding a hotel and adding a room.
- There are options such as filtering by region and taking reservations on certain dates.
- It is the backend of the Booking clone I made using React, made using Node.js.
- Register / Login / getAllUsers / getAllHotels etc. functions are made and mongoDB is used.
